Dear *Anthony* Anthony,

Thank you very much for your excellent presentation at the Environmental Congress. The information about Low Impact Development, using preliminary environmental assessments of a site, was very effective and presented in a way that a layman could understand – not an easy task! It was really useful for environmental commissioners and local officials! The evaluations placed this workshop as one of the most popular.

We were pleased with the turn-out at the Congress – over 200, especially since it was a “nice weather” Saturday.

We especially appreciate your willingness to help us out, to share your expertise and your careful preparation. You certainly provided attendees with excellent ideas to go home with.

Sincerely,

Abigail Fair
