Oldwick, NJ 08858

It is with great pleasure that we recommend "Back to Nature" for landscape architecture design and build services.

We hired Back to Nature for landscape design and install of several projects in our back yard. Anthony Sblendorio and his skilled staff of landscape architects designed and installed a terrace, tennis court, arbor, wildflower meadow and a beautiful Shakespeare garden. Their talents were also evident in the landscape plantings around our pool, tennis court and home. The detailed plan fit into our existing setting and made it look as though it had always been there.

The attention to detail, respect for the environment, and overall knowledge that Anthony and his team brought to our projects helped make our home beautiful retreat that it is today. They continue to help keep our place looking immaculate and, when we need something, they are always only a phone call away. We are very pleased to have chosen them for our projects. You will be too.

Sincerely,

Terry and Prudence Pigott
